

Wood Handle & ScoreMaster® Glass Cutters

Gold Tip® Designer II™ Glass Cutters

Here are three serious hand tools...for serious users who want it all: comfort, flexibility, and durability. These high quality hand tools feature Fletcher's Fiberlock™ anti-leak fluid dispensing system...the one that lays down a perfect bead of our own EnviroGOLD cutting oil for smooth, precise scores.

Gold Tip® Glass Cutters

Glass has always been an integral component of custom framing jobs. And Fletcher Gold Tip Glass Cutters have long been the preferred tools for those who still prefer to score by hand.

Each one comes with your choice of steel or tungsten carbide wheels. Plus, we make Gold Tip Glass Cutters in varying angles to suit your many different scoring needs.

Wood Handle Glass Cutter

The contoured wood handle provides a high level of comfort and control. Plus, the replaceable six-wheel turret gives you six times the cutting life for greater economy and longer-lasting performance. With two notched grooves, the Wood Handle Glass Cutter is designed to break narrow sheets of glass in varying thicknesses.

ScoreMaster®

The ScoreMaster I is a dry cutting glass cutter, and the ScoreMaster II features an oil dispensing system that produces a continuous, even flow of oil along the score line. Both feature a contoured pencil grip handle and 140° tungsten carbide cutting wheel.

WOOD HANDLE GLASS CUTTER PART NUMBERS
