

# CUTTING WITH FLETCHER-TERRY

## COMPLETE CUTTING NEEDS

No matter the substrate—matboard, foamboard, aluminum, acrylic or PVC—the Fletcher-Terry Company can cut it. Here are five top-of-the-line cutters the company offers.

### Rail Cutters

#### Gemini/GeminiPro

**Cutting Capacity:** from 40" up to 120"

**What It Cuts:** foamboard, corrugated plastic, Gator Board®, PVC and flexible media up to ½" thick

**Notable Features:** 90-degree straight side cutting; adapts to optional Atlas work bench equipped with elevator mechanism to align and secure materials; quick-release magnetic blade magazine.

The Gemini cutters/trimmers allow you to cut and trim on the same machine. Their unique cutting head design allows you to switch from a blade cutter or a light-duty rotary trim wheel depending on the type of graphic materials being cut.

The combined cutting/trimming design saves time and equipment investment by purchasing one machine for both cutting and trimming rather than two dedicated machines and maximizes the use of a large variety of media requirements.

#### Titan

**Cutting Capacity:** from 40" up to 120"

**What It Cuts:** foamboard, corrugated plastic, Gator Board®, PVC and flexible media up to ½" thick

**Notable Features:** 90-degree straight side cutting; quick-release magnetic blade magazine.

The Titan is a unique bench top cutter and trimming device. Its one-piece aluminum base and robust clamp rail assembly incorporates both a bold cutting track for rigid materials and trimming base for flexible materials.

#### Fletcher 2200

**Cutting Capacity:** 40", 48" and 60"

**What It Cuts:** matboard, Gator Board® and foamboard up to ½" thick

**Notable Features:** bevel and 90-degree straight side cutting; cuts V-grooves; sight line guide eliminates overcuts; quick-release magnetic blade magazine. The 2200 is one of the market's most recognized cutters.

### Wall-Mounted Or Free-Standing Cutters

#### FSC Substrate Cutter

**Cutting Capacity:** 65"

**What It Cuts:** matboard (multiple sheets at one time), foamboard, corrugated plastic and PVC up to ½" thick, hardboard, aluminum composites up to 4 mm thick and aluminum sheets up to .063" thick

**Scores:** glass, acrylic

Cut clean, straight, accurate and debris-free with the FSC Substrate Cutter. The FSC is robust and engineered for

long-term durability. This cutter features six different interchangeable cutting blade and wheel holders, a unique laser cutting guide that shows cut line on substrates for pre-printed graphics or dry mount and a tool caddy that stores blades and cutting wheels for quick and safe access. Wall mounted or free standing.

#### Fletcher 3000®

**Cutting Capacity:** available in 48" and 60"

**What It Cuts:** matboard, foamboard and plastic up to ¼" thick

**Scores:** glass

One of the company's top-selling cutters, the Fletcher 3000's patented triple head cutting turret rotates the specific cutting and scoring blade needed for the application. This frameshop

workhorse is actually three cutting machines in one. Wall-mounted assembly.
