

FOR IMMEDIATE RELEASE

The Fletcher-Terry Company, LLC

Technical White Paper: *The Principals of Glass Cutting*

Fletcher-Terry LLC, Farmington, Connecticut, USA: *The Principals of Glass Cutting, A Comprehensive Technical Guide to Successful Glass Scoring and Cutting Technology.*

This technical document is aimed at examining, evaluating and providing effective methods for controlling one of the key process elements for quality glass cutting. It examines all the critical components of glass cutting - wheels, axles, pillar post and inserts.

Fletcher has included a cutting application guide as well, with a number of cause and effect scenarios of recording operating parameters. Supported by 3D illustrations, the document is geared for use by float plants, automotive, and architectural fabricators alike. Available in English, Portuguese, and Chinese.

About Fletcher

Since 1868, Fletcher-Terry has revolutionized advanced cutting solutions for numerous global industries. Fletcher's innovations has rewarded the company with over 90 patents including the "original" glass cutting wheel, the first vertical glass cutting machine and the "wide-track" all carbide cutting wheel. Today, with a distribution network to 60 countries worldwide, we are proud to serve the glass production and fabrication industries, sign & graphic, picture framing and retail hardware, while continuing to provide advanced cutting methods and outstanding global customer service support.
